MSC #466, Pasadena, CA 91126-0466

Education

California Institute of Technology **Pasadena, CA**
Electrical Engineering with a minor in Computer Science, GPA: 4.0/4.0 *Oct. 2012 - present*

- **Current Coursework:** Intro to Embedded Systems (Altera Cyclone III FPGA Oscilloscope), Electronics Laboratory, Quantum Physics, Ordinary Differential Equations
- **Past Coursework:** Intro to Embedded Systems (Intel 80186 Robotrike), Circuits and Systems, Semiconductor Devices, Solid-State Electronics (Lab), Intro to Algorithms, Intro to Computing Systems, Decidability and Tractability, Abstract Algebra, Probability/Statistics, Complex Analysis, Wave Physics
- **Activities:** ACM-ICPC Programming Contest (*2012-14*), Robotics Team (Electronics - SONAR subsystem) (*2012-14*)
- **Awards:** Member of Caltech's top ACM-ICPC team, 3rd place at regionals (*2013*)

Thomas Jefferson High School for Science and Technology **Alexandria, VA**
Senior Research in Computer Science, GPA: 4.45/4.00 *Sept. 2008 - June 2012*

- **Relevant Coursework:** Microprocessor Electronics (including Motorola MC6800 Assembly programming), AP Computer Science, Artificial Intelligence, Single and Multivariable Calculus, Advanced Math Techniques with Linear Algebra, Differential Equations, Complex Analysis
- **Activities:** Computer Team (co-captain, *2010-12*), Varsity Math Team, Botball Robotics, Physics Team
- **Awards:** USACO (algorithmic coding, gold division), ACSL (CS topics, 1st place team, *2010*; 1st place individual, *2010-11*), IDT (programming development, 1st place team, *2011*), AIME qualifier (math, *2009-12*), Naval Research Lab (1st place project in CS, *2011*)

Work and Experience

Google (Research Division), *Software Engineering Intern* *Summer 2013*

- Developed image processing techniques to clean a sequence of object photos to QA specifications, allowing for a much larger class of object image sequences to be processed; currently for Google Shopping
- Used C++, OpenCV, and the Ceres non-linear solver library

Naval Research Laboratory, *Intern, High Performance Computing* *Summer 2011, 2012*

- *Summer 2012:* Built a molecular dynamics simulation in C; compared different integration step algorithms including brute force, linked cell, and monotonic Lagrangian grid
- *Summer 2011:* Created an MPI (Message Passing Interface) library for parallel operations on a grid in C++, tested on a wave propagation simulation, then analyzed its efficiency

Skills and Interests

Engineering Projects (built from scratch):
Circuit Design and Construction: Designed and etched circuit boards; soldered through-hole and SMD components (down to 0402 size) onto the boards. Also designed, built, and tested 4-layer boards
Electronic Devices: Lasers (solid-state diode, class 3B), flashlights using high power LEDs with MCU control and various peripherals (IR control, Li-Ion charging, etc), coilgun, rudimentary microprocessor oscilloscope

Tools and Languages:
Tools/Software: LaTeX, Git, Mathematica, some Matlab, EAGLE PCB Design, Autodesk Inventor, LT spice, Oscilloscopes, Signal Generators, Soldering (hand, hot air), machine tools, basic laboratory equipment
Languages/Libraries: C/C++, Java, Python, HTML, CSS, JavaScript, x86 Assembly, Arduino/AVR C, OpenCV, Ceres non-linear solver, MPI (parallelization platform), some Bash

Hobbies and Interests: Mathematics and Computer Science; Analog and Digital Electronics; Puzzles; Designing, Developing, and Constructing Electronic Devices (mix of EE, CS, and ME)
See website for detailed project descriptions (http://www.albertgural.com/projects/).
